

# Facial Emotion Recognition

Facial emotion recognition is the process of detecting human emotions from facial expressions. The human brain recognizes emotions automatically, and software has now been developed that can recognize emotions as well.

This technology is becoming more accurate all the time, and will eventually be able to read emotions as well as our brains do.

Till then, here you have what ALMA could recognise.

It's something!

the most frequent emotion in the video is ANGRY

You were angry, and you know it!
